

BridgeNAS

Move faster...

IT Challenges – Secure File Sharing

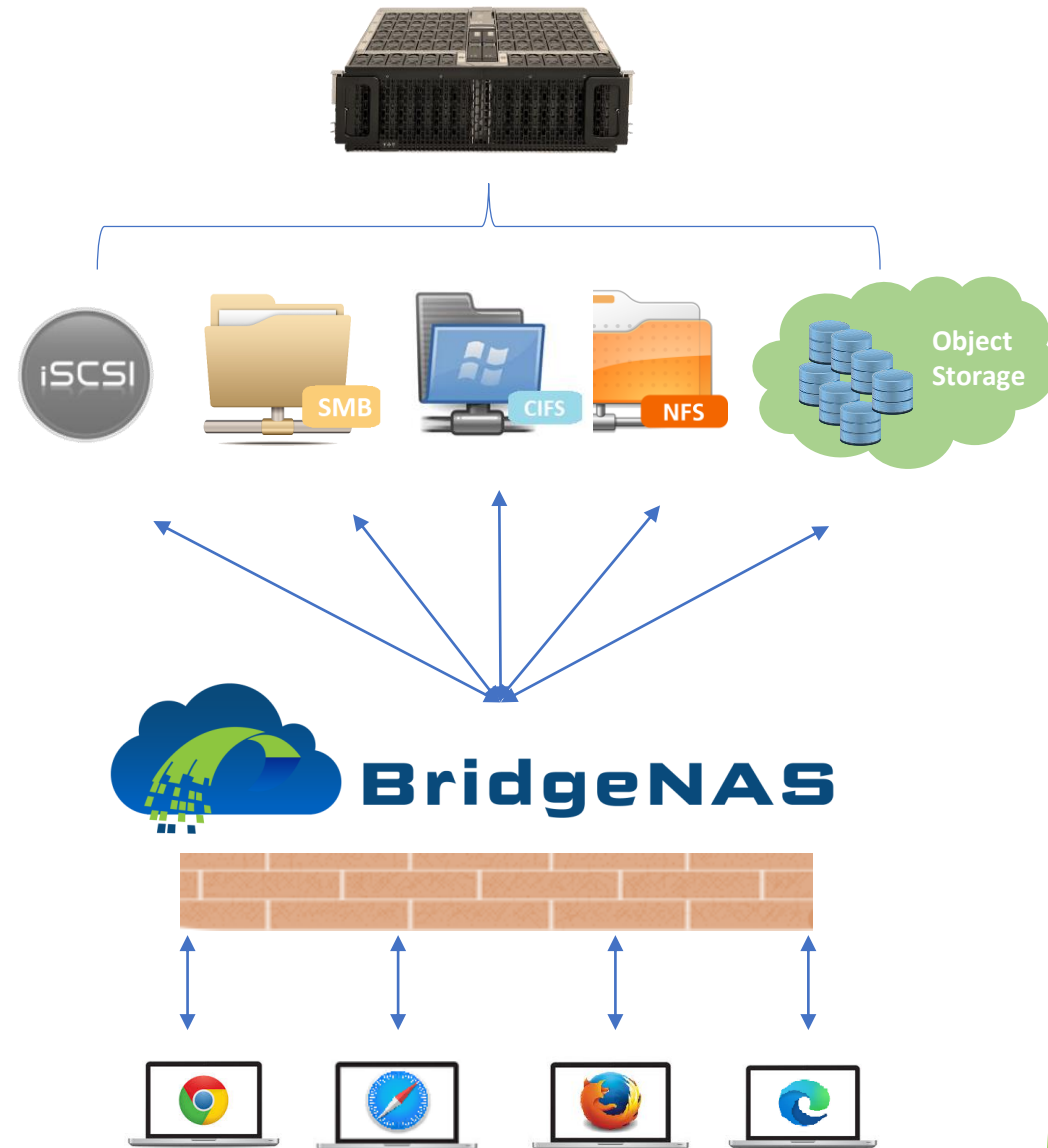

- ❑ Need for high performing secure access to data / files 'on the go'.
- ❑ Users frequently experience connectivity issues and sluggish performance over VPN
- ❑ Today's Data is distributed across heterogeneous storage solutions making it cumbersome for users to locate and access data
- ❑ Close monitoring and audit of user access and file operations
- ❑ Detection of anomalies in access patterns
- ❑ Large set of users use personal online file sharing for company confidential data

In this age of ever evolving technology ecosystem, organizations need robust and secure solution to access internal file resources from an external world.

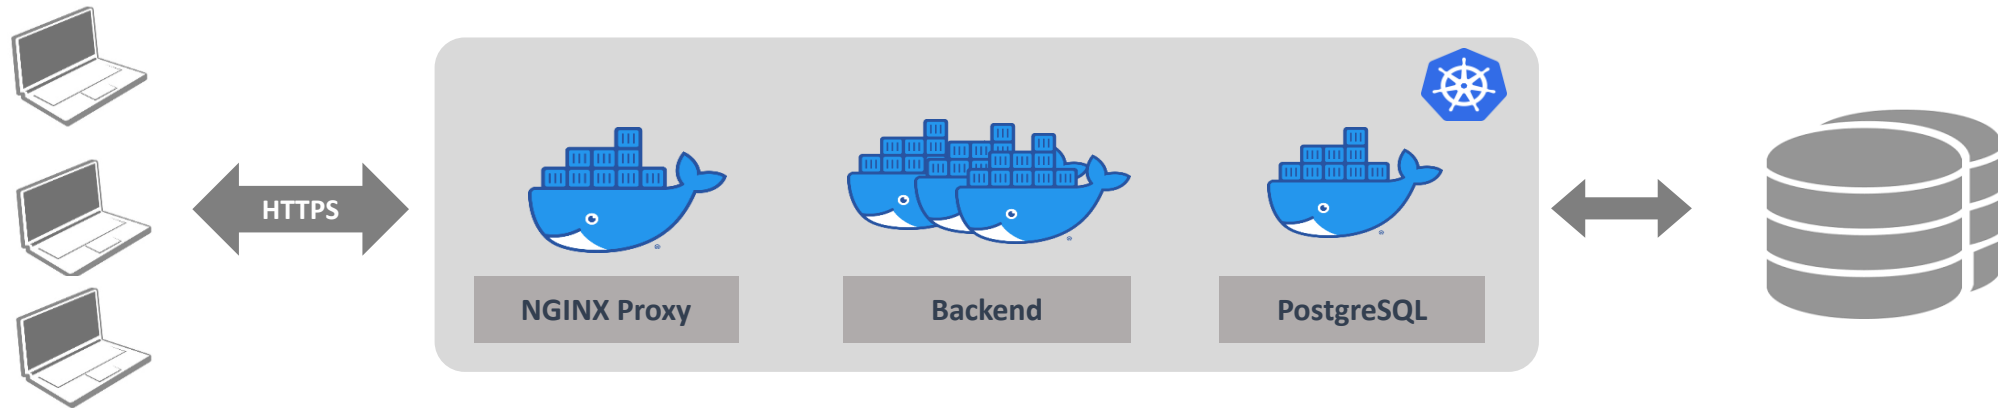

BridgeNAS - Secure Data Access

- ❑ **Gateway** to your Internal Data
- ❑ Simplifies **Access to Data / Files** residing in internal storage over **secure channel**
- ❑ Get data from your **Distributed and Heterogenous Storage** in a single glass pane
- ❑ Integrates with your corporate **ADS** and **Two-Factor Authentication**
- ❑ **Web based** end to end **Encryption** enabling secure access
- ❑ Built-in **Analytics** enabling operations **Audit** and detection of anomalies.
- ❑ All the above, **Without Losing Control** of internal resources and zero disruption to operation
- ❑ **BridgeNAS** is **Secure, Cost-Effective**, and best of all, **Easy to Use**.

Deployment / Operation

BridgeNAS is designed for On-Prem deployment; integrate with your IT ecosystem

Deployment

- POC – demonstrate key values
- Product Installation
- Integration with ecosystem
- Bench Test & Training
- Transition to production

Custom Development

- Integration with preferred tools / framework
- Tailor-made new Feature development
- Additional storage solution integration

Support Services

- Platform Upgradation
- Issue resolution
- New Feature implementation

Features

Current Features

- Secure Remote File Server Access
- IP White List
- Access Logs
- End to End Encryption
- Private / Public Cloud Migration
- Two-Factor Authentication
- Auditing and Reporting
- Auto-scale Design
- Online File view
- Custom Branding

Features Arriving

- Offsite / Cloud Backup
- Mapped Drives
- iOS / Android Access
- On-Demand Synchronization
- Offline Folders
- Cloud File Shares
- Online file editing
- Team Collaboration
- Guest User Access

Commercials

Subscription Model

- Monthly Cost per User
- Minimum of 50 users
- Monthly / Quarterly Billing
- Includes product upgrade and Support

Perpetual License

- One time upfront Cost
- Includes one year free support
- AMC for future Support
